Home based, Colorado Springs, Colorado 80907

Commercial Drone Pre-Apprenticeship (Metaverse, AI, and Web3)

Opportunity Category

Internship

Company Overview

Infinite 8 Institute, L3C, is a technology firm, specializing in emerging technology training and research and development. The firm also has created the World's First Apprenticeships for Commercial Drone Pilots and Commercial Drone Software Developers. Our Pre-Apprenticeship includes [8] modules, including Drone Tech, Internet of Things, Engineering Unmanned Data Capturing Platforms, Introduction to Artificial Intelligence, among others.

Internship Summary

Infinite 8 Institute is providing a dual internship and Pre-apprenticeship course offering. Students will take 6-week courses on Blockchain, Artificial Intelligence, the Internet of Things, and more during a Pre-apprenticeship course. Students will also gain on-the-job training while serving as interns in the same respective field as their coursework. Students will conduct market research, work on real-world projects, learn to communicate original ideas, and work individually as well as in groups. Apply by November 31st to join the Spring Cohort. COURSEWORK DESCRIPTION --> See "Training Description" for outline of weekly topics. TUITION FOR COURSEWORK --> See "Details of Opportunity" for tuition fees and financial aid options. PAYMENT FOR INTERNSHIP --> Students accepted into this internship may qualify to be paid minimum wage for up to 60-hours of internship, subject to available funding and successful onboarding. See "Other Student Requirements" for more details.
